WORKING EXPERIENCE

1. Undergoing practical training at MS Time Sdn Bhd, Prai, Pulau Pinang for four month. MS Time is a company that provided service, installation and rental for overhead crane, mobile crane, skylift and etc. There i had been appointed as assistant operation engineer. My job scope is to supervise technician when they doing services and installation on site, troubleshoot the electronic hoist, inspect the overhead crane after been service and arrange schedule for service team. My major project at that time was i had to solve hoist error for Petronas Chemical and Fertilizer Kedah. The main system of the overhead crane become error and cannot be operated.
2. After that, i work in LT Consultancy Penang. LT Consultancy is a civil engineering company that focus more on building pipeline, sewerline, pump house and etc. I work as design engineer in that company. My field work is more on mechanical and electronic design drawing, check drawing for M&E. I also goes to project site for inspection, to ensure that the M&E setup is based on the drawing and approve it for endorsement.
3. Then i joined Skim Latihan 1 Malaysia (SL1M) under Khazanah Nasional. This program is for 7 month period, 1 month in class which is interpersonal skill class and 6 month in industry. Now i on training in Entegris Malaysia as Engineering Technician, engineering deparment. My main task is to assist technician on new development project, analyze the data provided by QA for the new product, sampling, testing and improve new product based on the data, create, change and display SAP system for the new product and support production with the existing product. Currently, i work as Engineering Tech. at Entegris Malaysia. My job scope is to run sampling NPD, run functional test for new product, run tweaking process for existing product, analyze, compile data and qualified the new product.
