FINAL YEAR PROJECT

Title: The Relationship between Lateness, Absenteeism and Labour Turnover with Employee Productivity

Executive Summary:

This study focuses on the relationship between lateness, absenteeism and labour turnover with employee productivity within the organization. A quantitative methodology is adopted in which data is obtained through a questionnaire. Simple random sampling technique is used and the data obtained from the questionnaire is statistically analyzed. The findings from this study may help the manager to solve the problems of lateness, absenteeism and labour turnover issues in the organization.
