Dear Mr/Mrs/Ms,

Application for employment: SL1M Process Engineer position

With all my respect, I am interested to apply for job vacancy as SL1M Process Engineer and related engineering position in your company. For your information, I have completed my bachelor's degree in Material Engineering at one of Malaysian local university which is University Malaysia Perlis (Unimap).

The nature of my study has prepared me for engineer position. It involved a great deal of independent research, requiring initiative, self-motivation and wide range of skills. I am able to perform variety of testing, characterization and data analysis using machines and have knowledge in Non-Destructive testing (NDT) method. I am also be able to design using computer aided design (CAD) such as Solidworks (2013-2016), AutoCAD and also T-Flex.

I am confident that my skills and strength in engineering fields can make significant, contribution to the continuous success of the organization. I have gone through internship and work experience as toolmaker and assist toolmaker in electronic connectors manufacturing company, Molex (M) SdnBhd where I was given task a fresh graduate. I have performed well during my work which had helped me to expose to various practical knowledge and managerial skills.

Your kind attention and consideration is very much appreciated and I would appreciate the opportunity and best served the organization. Enclosed is my resume and cover letter are attached for review.

Availability: Immediately
Thank you in advance and best regards.
Your sincerely
