Dear Sir/Madam,

Application for the Position of Mechanical Engineer (SL1M)

I am a fresh graduate of Bachelor (Hons.) in Mechanical Engineering from Universiti Teknologi MARA UiTM), Shah Alam. I am writing to you for the graduate opportunity as Graduate Mechanical Engineers. I am keen to apply this position because I believe that my skills competencies have met your requirement plus with relevant technical experiences that would contribute to your business vicinity specifically in Mechanical Engineering field.

I had been involved in quality inspection of glove design and also part of research team on the new glove design during my internships program for three months. I also lead the design team to draw the cooling system for the glove dipping machine. Moreover I am a design leader for braking department of a single seated vehicle that participate in Mechanical Design Day race competition during my college time. I had gained some experiences in scheduling and managing a project. I also have excellence critical thinking skills and easy to learn new things. I am moderate in English and fluent in Bahasa Malaysia and I also studied level 3 Japanese language in college. I am a committed to my duty as well as a multitasked person. I also have excellence knowledge and soft skill in engineering design as well as able to operate a few of engineering software.

I am capable of operating with Catia, Auto-Cad, C++, OpenFoam, and also ANSYS software. With these sets of skills I am able to use engineering design mechanics and simulation to analyse the product and predict the failure rate in order to produce a better product for the company.

I am willing to come for an interview at any time convenient to you. I can be contacted at 011-23813484 or through my email at nasyrulhafizi@gmail.com. I am looking forward to your response.

Sincerely,

Nasyrul Hafizi Bin Abd Rahim
