Dear Mr/Mrs,

**APPLICATION FOR ENGINEER POSITION**

I am currently studying in Degree of Manufacturing Engineering with Management that is expected graduating in July 2017. I am looking for a role where I can help make a real impact in the business and am ready to make the next step into a career building role. As such I would like to work for an organization where I can be given the opportunity to expand my knowledge of design and the theoretical knowledge of Manufacturing System and apply it to real life situations.

I am very willing to relocate as I am keen to gain a full-time position working within an Engineering department using the above skills and capabilities.

I enclose my resume and I am available for interview at your convenience. References are available on request and I very much look forward to hearing from you as appropriate.

Thank you for your consideration.

Sincerely ,

Haziqah.

(Nurhaziqah Binti Nayan)
