To whom It May Concern,

Dear Sir/Madam,

APPLICATION FOR JOB VACANCIES (fresh graduate)

The above matter refers. I am writing to apply job vacancies for any related environmental engineering field. I am a student environmental engineering from University Malaysia Perlis (UniMAP) and have finished my final exam and has graduate on 23 October, 2016.

The university's unique three months internship program have develop my self confidence and high level of motivation and able to do multitasking job at one particular time. With well equipped soft skills, I am able to deal with people of different types of personality. I was able to develop my skills and broaden my knowledge in this field of my specialization. I am also have done my final year project and integrated project design

On the other hand, during my study, i required to complete various assignments and projects given either individually or in group. These assignments and projects acquire a lot of dedication and commitment which not only help me grow intellectually but also on the soft skills. I have been not only leader in those group projects but also a good follower who contributes to the team success.

I hereby enclose my resume for your reference and please feel free to contact be if you need more detail. I would be available at any time to attend an interview at your convenience. Thank you for your consideration to my application. I certainly look forward to exploring this opportunity further. Looking forward to hearing from you soon.

Your sincerely.

Amirul Islah bin Ibrahim
