Dear Sir,

Application for the Job

As refer above, I am interested to apply job for the position available in your company.

I am fresh graduate in **Bachelor of Engineering Technology (Hons.) in Manufacturing (Automotive)** from the school of Engineering Technology, UniKL Malaysian Spanish Institute on 2017. I become convinced that I have the necessary skill, abilities and future potential for looking job to your company.

With my experience during learning period at university and in Industrial training has prepared me to a great extent for the challenges and responsibilities in facing the real job. I am very eager to become part of a winning team like yours, and right now I am looking for a role that will give me the opportunity to become actively involved in real working world and gain practical work experience in the engineering field.

I have enclosed my resume which is explain detail about my experience and qualification. Perhaps the detail about me will meet your requirement. Lastly, I would be available at any time to attend an interview at your convenience and look forward to hear from you soon. Thank you for taking time to review my application.

Your Sincerely,

Mohamad Zulkifli bin Che Embi
