Muhamad Afdhal Abdul Halim

I'm an electrical engineer graduated from Universiti Malaysia Perlis with high enthusiasm looking for new opportunity and challenge. My target is to achieve the highest point in work life and have a stable and challenging career that can used my personal capability and creativity where I can embrace and enhance my skills and improve my knowledge in the outside world.

Hiring Manager,

APPLICATION FOR SL1M

I wish to apply for the post of SL1M which I saw advertised on the website. I am a graduate student from Universiti Malaysia Perlis, studying Bachelor Degree (Hons) Electrical Energy System. I have a long-standing interest in engineering and believe that I have the qualities and experience required to be a successful candidate.

My enthusiasm for pursuing a career in this area stems from my interest in working machines and electrical generation, and my desire to make full use of my skills in achieving and contributing to society. After my experiences internship with Jabatan Kerja Raya Seri Manjung, I am attracted by the opportunity to work in the engineering sector. I myself can work independently or in a team whenever is required. I also whole hearted willingly to learn new things and adapt the situation with minimal supervision if the chance is given to me. Beside that I have a very good interpersonal skill, leadership and most important communication skills.

Motivating people to work with me towards a common, worthwhile goal is something that I find hugely enjoyable and rewarding. One of the most rewarding aspects of being at Jabatan Kerja Raya Seri Manjung has been the experience that I have gained from En. Ibrar. During my time on the committee the I have exposed to the real life situation on site with the site engineer handling the layout and both the challenge of raising the profile of the society and my work with people themselves.

I would welcome the opportunity to discuss my application with you and look forward to hearing from you.

Yours sincerely,
Muhamad Afdhal Abdul Halim
