Dear Mr/Mdm/Ms.

APPLICATION FOR THE POST OF SLIM-R&D CHEMIST POSITION

I wish to apply for the SLIM-R&D Chemist position as advertised in the Workshire homepage and I would like to be considered for the position.

I am a recent graduate in Chemistry course from Universiti Teknologi Mara who is just finished my study in December 2016 and currently seeking for a job.

I've learned that your company's is dealing with personal care products and cosmetics. I am very excited as well as interested about the opportunity in pursuing a career as a chemist and to work as a part of your team. For your information, I have gone through a four-month industrial training at Permula Sdn. Bhd. during my final year of studies. I was posted in Water Division where I helped my supervisor to do R&D.

I have experience in handling analytical instruments such as GCMS, HPLC, AAS and UV spectrophotometer. I am someone who is willing to learn something new and I would love to gain more and widen my knowledge in this field. I am also willing to undergo training to further improve my capabilities.

I have attached my resume which provides more information and details about my skills and accomplishments.

I am looking forward to come over for a personal interview with you anytime. I can be contacted via 0174281610 and also by an email (iffah_izzati93@yahoo.com). Thank you for your consideration.

Sincerely,

Nur Iffah Izzati Binti Mohd Subki
