## **PROJECT INVOLVED DURING UNDERGRADUATE STUDY**

### **FINAL YEAR PROJECT: DIGITAL CONTROL OF WATER LEVEL PLANT USING MYOPENLAB SOFTWARE**

It used open source software (Myopenlab), and Arduino UNO as a data acquisition card to control water level. To model the system water tank module is used and it is calibrated before modelling. It is then connected to Myopenlab software and tuned at the desired level.

### **CAPSTONE PROJECT: ELECTRIC BYCICLE**

This project use Arduino UNO, DC drive (BTS7960), magnetic sensor, LCD display and 24V battery. DC Drive is used to control speed of bicycle. It also display the speed of bicycle (km/h) and the life of battery.
