Dear Mr. / Mrs. / Madam / Miss,

APPLYING FOR SL1M – GRAPHIC DESIGNER

I'm applying for SL1M – Graphic Designer at your company. I'm fresh graduate in Bachelor of Engineering Technology (Hons.) in Mechanical (Automotive) from Universiti Kuala Lumpur (Malaysia Spanish Institute).

I'm fast-learner where I can learn something with limited supervision. Apart from that, I'm also a self-learner person where I just need basic concept or training on how to handling the machine. Besides that, I'm also very good at handling the stress with others as I learned from my experienced as I do a Freelance Photographer.

I have experienced in handling Dust Chamber, Water Ingress Test Equipment, and Thermal Cycle Chamber where I can do static temperature test on samples. So I can work with minimal supervision and training. Besides that, I also know how to use Adobe Photoshop CS6 where i believe can be very benefit to your company. For your information, I also know to use software Solidwork as I learn while I'm studied for my Bachelor.

I would enjoy having opportunity to have an interview about this position and how I could use my skill to benefit your company.

Thank you,

Yours sincerely,

Muhammad Firdaus Bin Ismail
