Dear Sir/Madam,

With great willingness, I am seeking the opportunity to apply myself for a (SL1M) - Mechanical Engineer at Talent Suites Sdn Bhd that posted on internet. This is an ideal stepping stone for me to know more and learn deeper in mechanical engineering field in view of my background and career aspirations. I now desire a fresh challenge, with the responsibility of progression, to enable me to fulfill one of my career objectives and practice what i have already learned during my studies.

As in my resume/CV attached, I recently graduate in B.Eng. Mechanical Engineering (hons.) Degree: with basic knowledge in mechanical engineering and learnt five extra mechanical core subject which are Renewable Energy, Introduction to Nuclear Engineering, Introduction to Sustainability Engineering, Radiation Safety and Waste Management, and Non-Destructive Testing. I have experienced a conceptualize complex design and develop components and products from concept to completion while preparing for final year project, mechanical design process subject and capstone project which is solo and grouping project with lecturer supervised.

Previously, I was an intern in Malaysia Nuclear Agency in Kajang where I've trained to use variety of software, and given opportunities to learn material, calculation, and others related to radiation protection of nuclear engineering. I did learnt new project from Prototype and Development team on how to run a finite element analysis using AutoCAD Inventor and practice to prepare full report for the project. This shows that i able to learn new things and willing to learn anything.

I believe I am suitable candidate to join Talent Suites Sdn Bhd as SL1M trainee in view of my knowledge and career aspirations. Meanwhile, I look forward to hearing from you soon so that I can elaborate on my skills.

Yours sincerely,

Nurul Amirah Bt Ramizan
