Student Project

Final Year Project 1(Diploma)

Project Name: Automatic Motorcycle Signal Indicator Using Arduino UNO and accelerometer

Project Summary:

Left, right and brake light are being placed on a shirt using LED. This shirt is wear by user during riding a motorcycle and all the signal will be display by the LED. For example when user make a turn to right, the right LED will turn on and when user hit the brake the LED will turn into red. Note that all this system are not control manually by man but using Arduino as it controller.
