19 MARCH 2017

Dear Sir / Madam,

**APPLICATION FOR THE QC CHEMIST**

Referring to the above matter, I would like to apply for the post of QC Chemist as well as any other post of related field at your organization where the description fits with my academic background, interest and skills-set.

I had graduated with a degree in Bachelor of Biomedical Science (Honours) International Islamic University Malaysia (IIUM / UIA) with CGPA 3.110. The four years course covers 3 year above theory and 1 year of internship course as well as research project. I had done my internship course at Hospital Kulim in many different areas for 2 month and a research project entitled “Quantitative Protein Expression Studies of Malaysian Broiler and Organic Chicken Skin”.

After graduated, I have decided to further my studies once I got an offer from Advanced Medical and Dental Institute, USM in Master of Science (Medical Research) with scholarship from My Brain 15 as I also was very interested with the course. This course is designed to provide a “cross fertilization” perspective in medical research with emphasis on dynamism and integrative approach. Scope of subject covered mostly medical based laboratory and clinical techniques. Meanwhile, I perform a research project entitled “Synthesis and Characterisation of Silver Nanoparticles using *Vernonia Cinerea* Aqueous Extract and Their Cytotoxic Activity against Kasumi-1 Cell Line. The research aimed to investigate the anticancer effects of *Vernonia cinerea* silver nanoparticles on acute myeloid leukemia (Kasumi-1) cancer cell lines.

During the industrial training, I got opportunity to learn the right techniques of performing tests onto the real specimens, hence allowed me to learn on how to interpret and handle various numbers of cases or unexpected results I got. I also got to handle advanced machines such as Cobas e411 analyser, Olympus AU680 and AU400. I have a positive attitude and love learning new things. I am also very good at working with people.

I invite you to call me as soon as possible for an interview. You may contact me at 013-3036121 or by email at [radhiyatulakma@gmail.com](mailto:radhiyatulakma@gmail.com).

Sincerely,

*Radhiyatul*

Radhiyatul Akma Mohamad Zani
