EXECUTIVE SUMMARY

I graduated with master in information technology. I have determination and passion in order to achieve success in the respective fields.

I have knowledge of Java programming, PHP, AJAX, jQuery, MySql and CSS, as the tools for developing a variety web applications required by the organization for specific purposes. Furthermore, I got an excellent result particularly in Java programming language subjects, during my studies at postgraduate level.

I had worked as an IT lecturer at a private college in Penang for 2 years and 3 months. It is known as Island College of Technology. During I worked there, I was assigned to teach the IT subjects including Database Systems, Visual Basic Programming, Linear Data Structure, Network Security, e-Commerce and Internet Technology subject.
